This griddle is for installation on Fire Magic grills and select grill accessories. See Table 1 for model compatibility. To install, follow the steps below.

**CAUTION:** Ensure the appliance is OFF and completely cool.

**INSTALLATION ON A GRILL**

1. Remove cooking grids (2 minimum).
2. Remove flavor grids as needed.
3. Remove zone separators (if applicable).
4. Install/hang the griddle inside the liner (see Fig. 1-1, A).
5. Place the griddle drip tray (see Fig. 1-2).

**INSTALLATION ON A GRILL ACCESSORY**

A griddle adapter (model #3683, sold separately) is required when installing a griddle onto a grill accessory. Call your local dealer for ordering information.

1. Remove cooking grid from grill accessory.
2. Place griddle adapter onto the grill accessory as shown in Fig. 1-1, B.
3. Place the griddle onto the adapter (see Fig. 1-1, B).

**Note:** The adapter has notches located on the top rear to allow for proper griddle placement.

4. Install the griddle drip tray as shown in Fig. 1-2.

**GRIDDLE USE**

- Before each use, dry the griddle and coat it lightly with vegetable oil or apply a non-stick cooking spray.
- Refer to grill / grill accessory owner's manual for details on lighting the unit.
- Preheat on HI flame height to bring to temperature. Adjust heat to maintain desired cooking temperature.

**Fig. 1-1 Install griddle**

**Fig. 1-2 Install griddle drip tray**
Cleaning the griddle after each use will avoid accumulations of flammable grease, fats, and other debris. Some debris and residue may remain on the griddle.

**Note:** The griddle will discolor due to exposure to high temperatures (this is normal).

**CAUTION:** Allow for the griddle to completely cool prior to cleaning.

- Never flood a hot griddle with cold water. This can cause griddle warping.
- **DO NOT** allow grease to accumulate on the griddle or in the drip tray.
- After each use, clean the griddle:
  - wipe down with a cloth and remove all food residue
  - use a spatula to scrape any excess food into the drip tray
  - use a soapy water mixture and scrub with a scouring pad to help remove cooked-in food
- After each use, carefully remove the drip tray then empty and clean it.
- If any cleaning agents are used, they MUST be removed/cleaned with soap and water prior to future use.
- Store griddle inside grill cabinet or in another dry location.
