

Technical Services Bulletin 17-04 New Built-In Grill Support Brackets

All **Fire Magic Echelon, Aurora** and **Choice** built-in grills, and all **American Outdoor Grills** built-in grills now include support brackets welded to the front and rear of the base of the grill (see illustration below). These allow the grill to sit safely and securely on a flat surface while it is being prepared for installation. These brackets do not impact installation, as the grill is still supported in the cabinet by the grill hangers.

This running change has been underway for several weeks and will be fully implemented in the near future. If you have any questions about this Technical Bulletin, please contact the Technical Service Department at 1-800-332-3973.
