### ELECTRICAL SAFETY INFORMATION

- To protect against electric shock, do not immerse cord or plugs in water or other liquid.
- Unplug from the outlet when not in use and before cleaning.
- **CAUTION:** Risk of Electric Shock - Dial in "0" position does not de-energize the unit.
- Do not operate appliance with a damaged cord, plug, or after the appliance malfunctions or has been damaged in any manner. Contact the manufacturer for repair.
- Do not let the cord touch hot surfaces.
- Do not use appliance for purposes other than intended.
- **Use only a properly wired and inspected 115VAC (15 AMP minimum) Ground Fault Circuit Interrupter (GFCI) GROUNDED 3-wire receptacle with this appliance.**
- The GFCI receptacle must be a WEATHER-PROOF IN-USE COVERED RECEPTACLE.
- Never remove the grounding plug or use with an adapter of 2 prongs.
- Do not use three prong adapters or cut off the third grounding prong in order to accommodate a two prong outlet. This is a dangerous practice since it provides no effective grounding for the refrigerator and may result in shock hazard.
- Use only extension cords with a 3 prong grounding plug, rated for the power of the equipment, and approved for outdoor use with a W-A marking.
- **The provisions of the National Electric Code as well as any local codes must be observed when installing the product.**

LOCATION
Do not install this refrigerator in any location not properly insulated or heated, e.g. garage, etc. This refrigerator was not designed to operate in temperature settings below 55° Fahrenheit.
Select a suitable location for the refrigerator on a hard even surface away from direct sunlight or any heat source, e.g. radiators, baseboard heaters, cooking appliances, etc. Any floor unevenness should be corrected with the leveling legs located on the front bottom corners of the refrigerator.

USE OF EXTENSION CORDS
Avoid the use of an extension cord because of potential safety hazards under certain conditions. If it is necessary to use an extension cord, use only a 3-wire extension cord that has a 3-blade grounding plug and a 3-slot outlet that will accept the plug. The marked rating of the extension cord must be equal to or greater than the electrical rating of the appliance.

* Not shown
CAUTION: Risk of Fire or Explosion due to puncturing of refrigerant tubing. Flammable refrigerant used. Handle with care when moving refrigerator to avoid either damaging the refrigerant tubing or increasing the risk of a leak.

UNPACK REFRIGERATOR
Remove all packaging material. This includes the foam base and all adhesive tape holding the refrigerator accessories inside and outside.
Inspect and remove any remains of packing, tape or printed materials before powering on the refrigerator.

LOCATE REFRIGERATOR
To ensure the refrigerator works at the maximum efficiency it was designed for, install it in a location where there is proper air circulation and electrical connections.

Important: When locating the refrigerator, be sure to follow all requirements and safety information in this manual (see the SPECIFICATIONS AND DIMENSIONS and INSTALLATION REQUIREMENTS sections).

LEVEL REFRIGERATOR
This refrigerator has two leveling legs which are located in the front bottom corners of the refrigerator. After properly placing the refrigerator in its final position, level the refrigerator.
Leveling legs can be adjusted by turning them counterclockwise to raise the refrigerator or by turning them clockwise to lower the refrigerator. The refrigerator door will close easier when the leveling legs are extended.

CONNECT POWER SUPPLY CORD
Connect the cord coming from the appliance's power supply to a 115VAC (15 AMP minimum) GFCI GROUNDED 3-wire receptacle. The GFCI receptacle must be a WEATHER-PROOF IN-USE COVERED RECEPTACLE.

ALIGN DOOR (if needed)
1. Remove the top hinge cover.
2. Loosen the top hinge screws using a Phillips head screwdriver.
3. Adjust the door or put a spacer in between and then tighten the screws.
4. Replace the top hinge cover.
REVERSE DOOR HINGE (if needed)

1. Remove the top hinge cover.
2. Using a Phillips Head Screwdriver, loosen and remove the screws holding the top hinge in place.
3. Remove the top hinge and carefully lift off the door.
4. Remove the screw hole plugs from the opposite side and insert the plugs in the screw hole openings of the just removed screws.
5. Remove any loose items in the refrigerator and carefully turn refrigerator on its back and place in a secure area.
6. Loosen the screws holding the lower hinge bracket to the refrigerator and remove the screws and bracket.
7. Remove (2) screws from the other side and insert in the previously removed screw holes.
8. Remove door pin by turning counter-clockwise and reinsert to the underside of the bracket and tighten.
9. Align the bracket and insert (2) remaining screws into the holes provided.
10. Align the hole in the door with the door pin and washer and gently push down until firm.
11. Align the upper hinge bracket with the screw holes, then insert screws and partially secure. Check that the door and cabinet are properly aligned, then secure tightly.
12. Replace the hinge cap.

Note: The door gets pressed in during shipping and may cause the door gasket from fully expanding to a proper seal. After reversing the door, the gasket may need to be reset. This is done to prevent the cool refrigerated air from escaping. If there is a gap between the door gasket and the cabinet, set the gasket by gently pulling it out to seal the gap.

Note: Wait 24 hours before plugging the unit in.
DIAL DE TEMPERATURE RÉGLABLE

Le réfrigérateur maintiendra automatiquement le niveau de température que vous choisissez. Le sélecteur de température a 7 réglages plus "0". "7" est le plus froid, "1" est le plus chaud, et "0" est zéro refroidissement. Au début, régler la molette sur "4" et laisser passer 24 heures avant de régler la température à la température désirée.

ATTENTION: Le cadran réglé sur "0" ne désactive pas l’unité.

ÉTAGÈRES INTÉRIEURES DE RÉFRIGÉRATEUR

Pour retirer ou remplacer une étagère à glissière:
• Inclinez doucement l’étagère et faites-la glisser vers l'extérieur jusqu'à ce que l'étagère soit complètement enlevée.
• Pour remplacer l'étagère, faites glisser doucement l'étagère.

Pour utiliser la tablette pivotante:
Il suffit de basculer l’étagère comme indiqué sur la Fig. 10-2. Ceci est conçu pour donner un stockage supplémentaire pour les grandes bouteilles.

COMPOSITION DE PORTE-PORTE

Le réfrigérateur est équipé d’un compartiment de porte-fil pratique. Le compartiment contient jusqu’à cinq boîtes. Il suffit de charger des canettes en haut. Pour distribuer une boîte, tirez une en bas du bas.

TIROIR

Le réfrigérateur est équipé d'un tiroir plus fin. Pour ouvrir le tiroir, agripper fermement la poignée et tirer vers l'extérieur. Faites glisser de nouveau pour fermer le tiroir-bac.

VERROUILLAGE ET CLÉ

Pour l'utiliser, insérez la clé et tournez dans le sens des aiguilles d'une montre pour verrouiller, et tournez dans le sens inverse des aiguilles d'une montre pour déverrouiller.

SONS DE FONCTIONNEMENT NORMAL

Les sons suivants sont une partie normale de l’opération:
• L’eau bouillante, les sons gargouillis ou les légères vibrations qui résultent du fait que le fluide frigorigène circule dans les serpentins de refroidissement.
• Le contrôle du thermostat cliquera quand il sera activé ou désactivé.
ADJUSTABLE TEMPERATURE DIAL
The refrigerator will automatically maintain the temperature level you select. The temperature dial has 7 settings plus “0”. “7” is the coldest, “1” is the warmest, and “0” is zero cooling. At first, set the dial to “4” and allow 24 hours to pass before adjusting the temperature to your desired temperature.

CAUTION: The dial set to “0” does not de-energize the unit.

REFRIGERATOR INTERIOR SHELVES
To remove or replace a slide-out shelf:
- Gently tilt the shelf up and slide outward until the shelf has been completely removed.
- To replace the shelf, gently slide the shelf back.

To use the slide-out flip shelf:
Simply flip the shelf as shown in Fig.11-2. This is designed to give extra storage for tall bottles.

WIRE CAN HOLDER COMPARTMENT
The refrigerator is equipped with a convenient wire can holder compartment. The compartment holds up to five cans. Simply load cans from the top. To dispense a can, draw one out from the bottom.

CRISPER
The refrigerator is equipped with a crisper bin. To open the crisper bin, grab the handle firmly and pull outward. Slide back in to close the crisper bin.

LOCK AND KEY
To use, insert the key and turn clockwise to lock, and turn counter-clockwise to unlock.

NORMAL OPERATING SOUNDS
The following sounds are a normal part of operation:
- Boiling water, gurgling sounds or slight vibrations that are the result of the refrigerant circulating through the cooling coils.
- The thermostat control will click when it cycles on and off.
All the exterior parts and interior parts of the product should be kept clean.
The refrigerator should be cleaned periodically. If the refrigerator is kept clean, its lifespan will be extended. Regular cleaning should be performed at least once a year; twice a year is recommended.

CAUTION: Before service or cleaning is performed, ensure the dial is set to "0", the power supply is disconnected, and all components of the unit are completely cool.

WARNING: To avoid electric shock, always unplug your refrigerator before cleaning. Ignoring this warning may result in death or injury.

CAUTION: Before using cleaning products, always read and follow manufacturer's instructions and warnings to avoid personal injury or product damage.

GENERAL CLEANING
Prepare a cleaning solution of 3-4 tablespoons of baking soda mixed with warm water. Use sponge or soft cloth, dampened with the cleaning solution, to wipe down your refrigerator.

Rinse with clean warm water and dry with a soft cloth.

Do not use harsh chemicals, abrasives, ammonia, chlorine bleach, concentrated detergents, solvents or metal scouring pads. Some of these chemicals may dissolve, damage and/or discolor your refrigerator.

DOOR GASKETS
Clean door gaskets every three months using cleaning solution and non-abrasive cloths or pads. Gaskets must be kept clean and pliable to ensure a proper seal.

Petroleum jelly applied lightly on the hinge side of gaskets will keep the gasket pliable and ensure a good seal.
MAINTENANCE

DANGER: Risk of Fire or Explosion due to puncturing of refrigerant tubing. Flammable refrigerant used. Do not use metal instruments to defrost refrigerator. Do not puncture refrigerant tubing.

- All safety precautions must be followed.
- To be repaired only by a qualified professional service technician.

LIGHT

To replace the bulb, carefully pull the plastic light cover to the left and remove. Locate and unscrew the bulb and replace it with a new bulb (use bulbs of 15 watts or less). Replace plastic light cover.

POWER INTERRUPTIONS

Occasionally there may be power interruptions due to thunderstorms or other causes. Remove the power cord from GFCI outlet when a power outage occurs. When power has been restored, reconnect power cord to GFCI outlet. If outage is for a prolonged period, inspect and discard spoiled or thawed food in refrigerator. Clean refrigerator before reusing.

VACATION AND MOVING CARE

For long vacations or absences, empty food from refrigerator and freezer, move the temperature dial to the “0” position and clean the refrigerator and door gaskets (see previous page). Prop doors open, so air can circulate inside. When moving, always move the refrigerator vertically. Do not move with the unit lying down. Possible damage to the sealed system could occur.

ENERGY SAVING TIPS

- The refrigerator should be located in the coolest area of the room, away from heat-producing appliances or heating ducts, and out of direct sunlight.
- Let hot foods cool to room temperature before placing in the refrigerator. Overloading the refrigerator forces the compressor to run longer and thus increases energy consumption. Foods that refrigerate too slowly may lose quality or spoil.
- Be sure to wrap foods properly, and wipe containers dry before placing in the refrigerator.
- The wire shelves should not be lined with aluminum foil, wax paper, or paper towels. Liners interfere with cold air circulation, making the refrigerator less efficient.
- Organize food to reduce door openings and extended searches. Remove as many items as needed at one time, and close the door as soon as possible.
Please use this page to record any information that you may want to have at hand.
