

## DOOR & DRAWER INSTALL SPECIFICATIONS

Model # AOG30UD Shown

Model # AOG24AR Shown

### GENERAL INFORMATION

**INSTALLER:** Leave these instructions with consumer.  
**CONSUMER:** Retain for future reference.

**WARNING**  
This unit is to be installed by a qualified, professional service technician.

#### Important: READ THESE INSTRUCTIONS CAREFULLY BEFORE STARTING INSTALLATION

- When installing this unit directly below another unit, only install with AOG built-in products.
- For proper installation, be sure to use the correct cutout dimensions as specified for your specific model number.
- It is recommended that silicon caulking (not supplied) is applied around the back of the door/drawer cabinet trim before sliding the cabinet assembly into the opening.
- Some models may include an additional owner's manual.
- **When used for propane cylinder storage, a louvered door model is required.**

**CAUTION:** Make sure the enclosure is properly vented. See your grill owner's manual for venting requirements, or consult your local codes.

#### WHEN USING A PROPANE TANK CYLINDER:

- **Never locate a cylinder under or near a grill unless sufficient ventilation and shielding is provided to prevent any heating of the cylinder regulator and hose.** Refer to any additional instructions included with your door (and/or your grill owner's manual) for the required installation method of propane tank cylinders.
- **FOLLOW ALL THE SAFETY WARNING AND INFORMATION FOUND IN THESE INSTRUCTIONS, ON YOUR PROPANE CYLINDER, AND IN YOUR GRILL OWNER'S MANUAL ABOUT SAFE STORAGE AND USE OF PROPANE GAS.**

# INSTALLATION GUIDELINES

For proper installation, be sure to use the correct cutout dimensions as specified for your model number. Locate your model on the following pages for dimensions, and reference the cut-out diagram of your unit for proper orientation.

## Bracket Hardware Kit

A door/drawer/pantry bracket hardware kit (BK-1) is for use with island enclosures with a wall thickness of (1 1/2" to 2 1/4") and all AOG GFRC Island enclosures. The brackets are designed to secure the accessory firmly, preventing it from being pulled out of the cutout and eliminating movement.

This kit includes four brackets, four short screws and four long screws. See Fig. 2-2. Wider models may include two kits.

**Important:** When installing in an AOG GFRC Island, this kit is supplied and must be used for installation.

## Installation

**Note:** Certain accessories may require preparation before installation (for example, removing drawers before mounting). Refer to the DOOR or DRAWER section as needed per your accessory for specific requirements.

1. Insert your door/drawer /pantry completely into the opening. Ensure it is flush against the exterior wall.
2. Based on the mounting surface/substrate of your island enclosure and the accessibility of your accessory frame, this kit can be installed using two methods (see Fig. 2-3). Install this bracket hardware kit as appropriate.

Use the oblong cutouts or round holes located on the top, bottom, and/or sides of the door/drawer/pantry frame to install and align hardware as applicable.

### Method A: Hook Brackets

- Hook bracket must be positioned between the door/drawer/pantry frame and wall of the cutout enclosure.
- Requires access to the interior of the grill island to install hook bracket correctly.
- If the interior cannot be reached through an enclosure cutout or with the removal of the countertop, an access door must be available to reach the interior of the island.
- It is recommended to use all brackets supplied in this kit.

### Method B: Long Screws

- No interior access required.
- The hook bracket is not needed for this installation.
- It is recommended to use a #21 drill bit (0.159") for pilot holes.

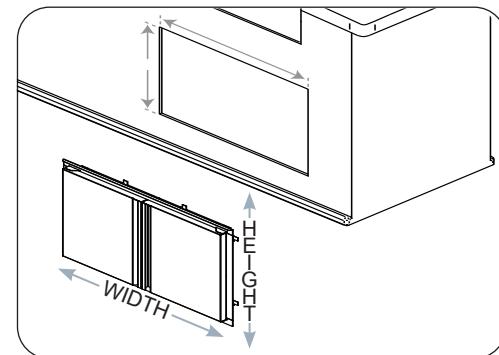

Fig. 2-1 Make correct cut-out

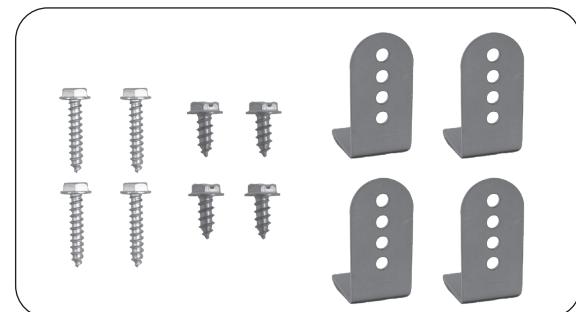

Fig. 2-2 Bk-1 kit

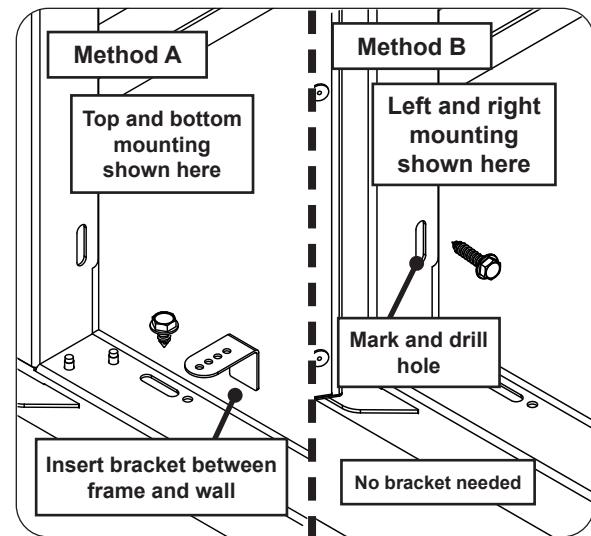

Fig. 2-3 Installation methods

Continue to the next page to install using your selected method.

## INSTALLATION GUIDELINES (cont.)

### Method A: Hook Brackets

**Note:** This method requires access to the interior of the island. Installation steps may vary depending on the specific accessory.

1. Use the oblong cutouts (or round holes) on opposite sides of the frame (either top and bottom or left and right). Reach from within the island and insert a bracket where a cutout exists, **between the wall and frame**. See Fig. 3-2, step 1.

**Note:** **Ensure the bracket flange is positioned away from the frame and rests against the island wall.**

2. While holding the rear of the bracket and the front of the frame **firmly** against the concrete wall, align a bracket hole to the frame's oblong cutout and insert a supplied short hex screw. Tighten the hex screw with a power drill and 5/16" hex driver (see Fig. 3-2, step 2). DO NOT OVERTIGHTEN.

**Note:** Installation may require a second person to hold the bracket against the wall from within the island enclosure.

3. Repeat this process for the remaining brackets.

**Note:** Only the cutouts on either the top and bottom or left and right sides of the door/drawer/pantry frame require brackets.

### Method B: Long screws

**Note:** **This method does not require the use of the hook brackets.**

1. Use the oblong cutouts (or round holes) on opposite sides of the frame (either top and bottom or left and right). Mark the holes as needed.
2. Drill pilot holes for each screw. See Fig. 3-3, step 1. It is recommended to use a #21 drill bit (0.159") to drill pilot holes.

**Note:** The pilot hole depth must accommodate the length of the long screws.

3. Insert your door/drawer frame into the cutout and position to the pilot holes.
4. Insert a long hex screw and tighten with the power drill and 5/16" hex driver (see Fig. 3-3, step 2). DO NOT OVERTIGHTEN.
5. Repeat this process for the remaining screws.

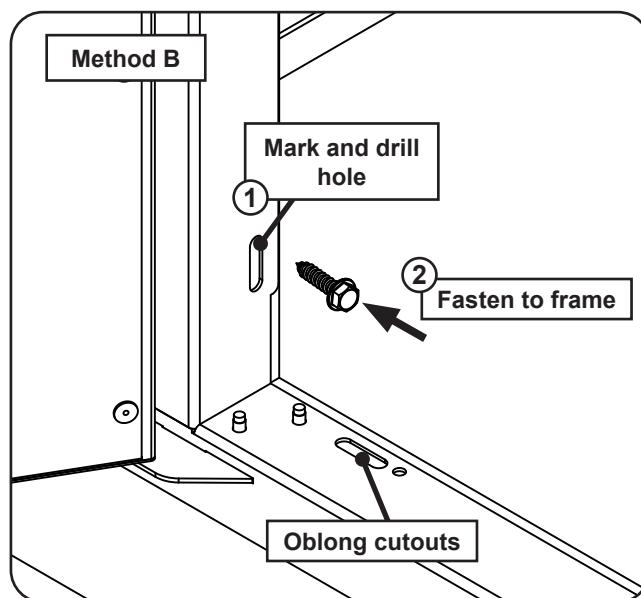

Fig. 3-3 Method B install detail

## INSTALLATION GUIDELINES (cont.)

### DOOR

Slide in and fasten the unit securely into the island enclosure using the supplied hardware through the installation screw slots in the top and bottom of the unit.

**Note:** If using a bracket hardware kit, see the Bracket Hardware Kit section before fastening any hardware.

#### For doors with propane tank trays:

To use, simply open the door, pull out the sliding cylinder tray, place your cylinder in the tank holder tray. Hook the round end of the pull-latch-screw over the bracket (found on collar of tray). Then snap the pull-latch-handle closed. Ensure the collar is securely holding the cylinder in place. (If needed the pull-latch-screw can be adjusted to tighten or loosen the collar.) Push the tray back in. The cylinder is now ready for connection to your grill. See Fig. 4-3.

**Important:** Refer to the instructions included with your door for propane tank installation.

### DRAWER

Before installing your drawer, remove the drawer from its base by completely pulling it out. Release the drawer from the drawer slides by pressing the black lever down on the right side, and up on the left side (Fig 4-5). Then pull outward on the drawer until it comes free of the runners.

1. In order to properly support the weight of your drawer, it is necessary to provide a secure, level surface in the rear of the unit (see Fig 4-6). This may be accomplished by using bricks, 2 X 4's, etc. Be sure that the height of this rear support is  $1/8$ " higher than that of the front opening support, so that your drawer sits level.

**Note:** If using a bracket hardware kit, see the Bracket Hardware Kit section before fastening any hardware.

2. Slide in and fasten the unit securely into the island enclosure using the supplied hardware through the installation screw slots in the top and bottom of the unit.
3. To re-attach the drawer; extend the drawer slides completely and align the drawer into the slides, pushing the drawer closed. Open the drawer to verify that it has locked in place.

## DOORS & DRAWERS

Cut-out is **height x width x depth**

**UTILITY DRAWER**  
MODEL: AOG30UD  
CUT-OUT: 13" x 31" x 20 1/2"

**SINGLE ACCESS DOOR\***  
MODEL: AOG20AR  
CUT-OUT: 15" x 20 1/2"

**DOUBLE DRAWERS**  
MODEL: AOG15DD  
CUT-OUT: 16" x 14 1/2" x 20 1/2"

**SINGLE ACCESS DOOR\***  
MODEL: AOG14AR  
CUT-OUT: 21" x 14 1/2"

**SINGLE ACCESS DOOR WITH TANK TRAY AND LOUVERS\***  
MODEL: AOG14TR  
CUT-OUT: 21" x 14 1/2" x 20 1/2"

**SINGLE ACCESS DOOR\***  
MODEL: AOG24AR  
CUT-OUT: 18" x 24 1/2"

**SINGLE ACCESS DOOR**  
MODEL: 17-24-SD  
CUT-OUT: 17 1/2" x 24 1/2"

**SINGLE ACCESS DOOR**  
MODEL: 20-14-SD  
CUT-OUT: 20 1/2" x 14 1/2"

**SINGLE ACCESS DOOR WITH LOUVERS**  
MODEL: 20-14-SDV  
CUT-OUT: 20 1/2" x 14 1/2"

**DOOR WITH DOUBLE DRAWERS**  
MODEL: AOG30ADD  
CUT-OUT: 18 1/2" x 30" x 26"

**DOOR WITH DOUBLE DRAWERS AND PLATTER STORAGE**  
MODEL: AOG36ADP  
CUT-OUT: 18 1/2" x 36 1/2" x 26"

**DOUBLE ACCESS DOORS**  
MODEL: 20-30-SD  
CUT-OUT: 20 1/2" x 30"

**DOUBLE ACCESS DOORS**  
MODEL: AOG30DA  
CUT-OUT: 21" x 30"

**Also available (not shown):**

MODEL: AOG20AL  
MODEL: AOG24AL  
MODEL: AOG14AL  
MODEL: AOG17A(L,R)  
MODEL: AOG14TL  
MODEL: AOG39DA

CUT-OUT: 15" x 20 1/2"  
CUT-OUT: 18" x 24 1/2"  
CUT-OUT: 21" x 14 1/2"  
CUT-OUT: 25" x 17 1/2"  
CUT-OUT: 21" x 14 1/2" x 20 1/2"  
CUT-OUT: 16" x 39"

\* Available in left or right hinge

## CARE & CLEANING

By following these recommendations, you will enjoy the beauty and convenience of your unit for many years to come.

### STAINLESS STEEL

As needed, use a grill cleaner (or a soapy water solution) and a clean cloth to remove grease and dirt from the outside of the unit. For tough deposits, a copper pad can be used. Always wipe with the grain. Rinse and dry completely. Then follow up with a stainless steel cleaner and a clean cloth.

If this routine cleaning is not performed, the stainless steel may become dull and develop surface rust (due to use and atmospheric conditions). If left uncleaned, significant damage and pitting may occur.

**Important:** DO NOT use steel wool, any other metal tools, or any other cleaners/chemicals to clean the exterior other than recommended above. Such items promote rust.

**When this unit is installed in a corrosive environment such as near the ocean (salt air), poolside (chlorine and/or pool chemicals) or any other location with exposure to high salt/chloride content or corrosive chemicals/solutions, it will be more susceptible to corrosion and MUST be maintained/cleaned more frequently.**

- DO NOT store any corrosive chemicals (chlorine, hydrochloric acid, fertilizer, etc.) near your stainless steel unit.
- DO NOT allow any corrosive materials (masonry dust, debris, etc.) to settle on your stainless steel unit.
- These environments, chemicals, and materials may cause the 304 stainless steel to develop surface rust and consequently pitting. Under these conditions the unit MUST be cleaned at least monthly. Inspect your unit often and clean accordingly.

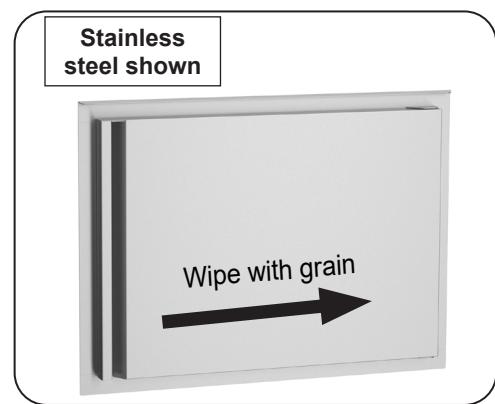

Fig. 6-1

# SAFE USE & MAINTENANCE OF PROPANE GAS CYLINDERS

## IMPORTANT FOR YOUR SAFETY

### READ AND FOLLOW ALL WARNINGS PROVIDED WITH THE PROPANE-GAS CYLINDER.

When operating this appliance with a propane-gas cylinder, these instructions and warnings **MUST** be observed.

**FAILURE TO DO SO MAY RESULT IN A SERIOUS FIRE OR EXPLOSION.**

**For requirements related to ventilation, L.P. Cylinders, and the enclosure, see owner's manual provided with your grill.**

## CYLINDER/CONNECTOR REQUIREMENTS

- a. Propane-gas cylinders, valves, and hoses must be maintained in good condition and inspected before each use of appliance. They must be replaced if there is any visible damage. If hose is cut or shows excessive abrasion or wear, it must be replaced before using appliance (see e.).
- b. This unit, when used with a cylinder, should be connected to a standard 5-gallon (20 lb.) propane-gas cylinder equipped with a listed overfilling prevention device. The device has been required on all cylinders sold since October 1, 1998, to prevent overfilling.
- c. Cylinder dimensions should be approximately 12" (30.5 cm) in diameter and 18" (45.7 cm) high. Cylinders must be constructed and marked in accordance with the U.S. Department of Transportation (D.O.T.) *Specifications for LP-Gas Cylinders*, or the Standard for Cylinders, Spheres, and Tubes for Transportation of Dangerous Goods and Commission, CAN/CSA-B339, as applicable.
- d. The cylinder used must include a collar to protect the cylinder valve. The cylinder supply system must be arranged for vapour withdrawal. See Fig. 7-1.
- e. When used with a cylinder, the gas supply system must be used with a pressure regulator. The pressure regulator and hose assembly (**not supplied**) used must match the specification for Type I by ANSI Z 21.58/CGA 1.6 and must comply with UL 144 as a part of the self-contained LP gas supply system (see Fig. 7-1).
- f. The propane-gas cylinder valve must be equipped with a cylinder connection device, described as Type I in the standard defined in paragraph e. above. This device is commonly described as an Acme thread coupler.
- g. If the cylinder comes with a dust plug, place it on the cylinder valve outlet whenever the cylinder is not in use. Only install the type of dust cap on the cylinder valve outlet that is provided with the cylinder valve. Other types of caps or plugs may result in leakage of propane.

## COUPLER OPERATION

**To connect the regulator/hose assembly to the propane-gas cylinder valve fitting:** Press the hand nut on the regulator over the Acme thread fitting on the cylinder valve. Turn the hand nut clockwise to engage the threads and tighten until snug. The use of pliers or a wrench should not be necessary. Only cylinders marked "propane" may be used.

**To disconnect:** Turn the hand nut counterclockwise until detached (Fig. 7-1).

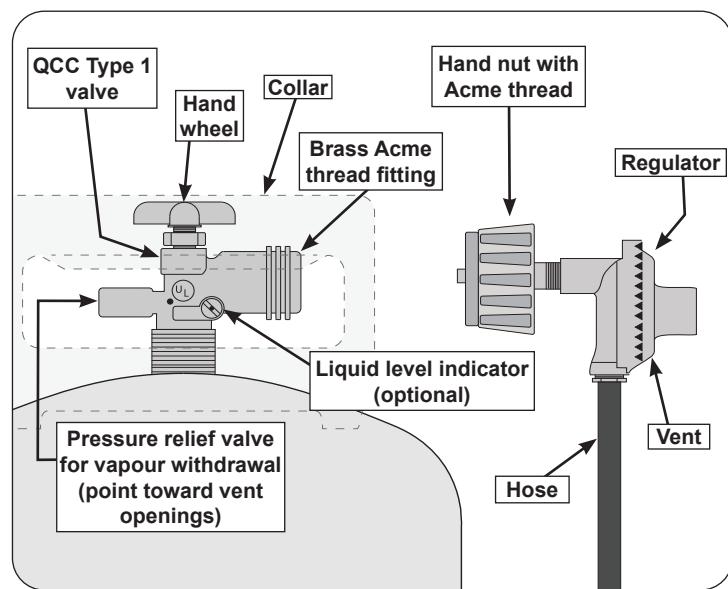

Fig. 7-1 Type I Acme thread coupler

## SAFE USE & MAINTENANCE OF PROPANE GAS CYLINDERS (Cont.)

**Important:** Before using the unit, and after each time the cylinder is removed and reattached, check the hose for wear (see a.) and check all connections for leaks. Turn off the unit valves and open the main cylinder valve, then check connections with soapy water. **NEVER USE A FLAME TO CHECK FOR LEAKS.** Repair any leaks before lighting the unit.

**CAUTION:** Always turn the propane cylinder main valve off after each use, and before moving the unit and cylinder or disconnecting the coupling. This valve must remain closed and the cylinder disconnected while the appliance is not in use, even though the gas flow is stopped by a safety feature when the coupler is disconnected.

**Carefully** inspect the hose assembly each time before the gas is turned on. A cracked or frayed hose must be replaced immediately.

If the appliance is stored indoors, the cylinder must be disconnected and removed. Disconnected cylinders must be stored outdoors, out of the reach of children, with threaded valve plugs tightly installed, and must not be stored in a building, garage, or any other enclosed area.

### FOR YOUR SAFETY

- A. DO NOT store a spare propane-gas cylinder under or near this appliance.
- B. NEVER fill the cylinder beyond 80-percent full.
- C. IF THE INFORMATION IN **a.** AND **b.** IS NOT FOLLOWED EXACTLY, A FIRE CAUSING DEATH OR SERIOUS INJURY MAY OCCUR.
- D. **CGA 791 connections on LP gas cylinders:** The cylinder face elastomeric face seal element (rubber seal) on these devices could, over time, show marked and visible damage or deterioration that might cause a leak even with the connection tightened. A visual inspection for the seal must be carried out every time a LP gas cylinder is replaced or refilled. Any LP gas cylinder showing signs of damage or deterioration as illustrated in Fig. 8-1, including visible cracks and pitting, must be replaced.

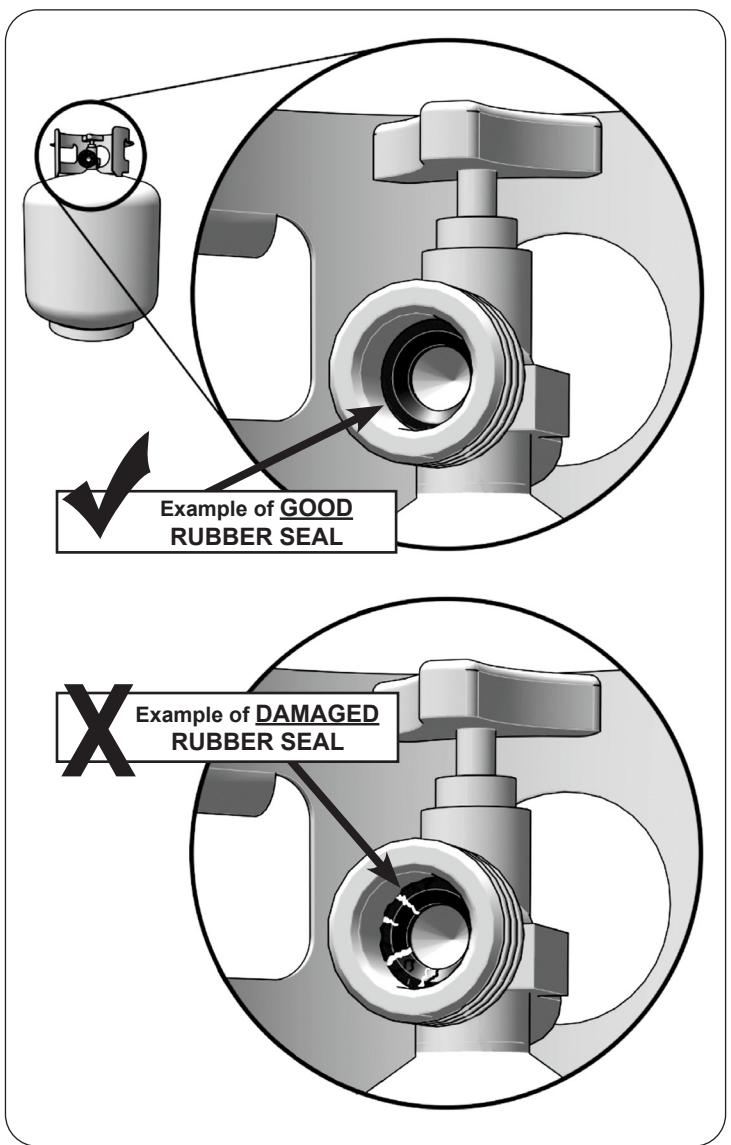

Fig. 8-1 Inspect rubber seal

## NOTES PAGE

Please use this page to record any information that you may want to have at hand.

# WARRANTY

## AMERICAN OUTDOOR GRILL - DOOR & DRAWER LIMITED WARRANTY

**TWO-YEAR WARRANTY** - American Outdoor Grill® SSD Series doors and drawers (with stainless steel tubular handles) are warranted for **TWO (2) YEARS** from the date of purchase.

**ONE-YEAR WARRANTY** - American Outdoor Grill® SD Series doors and drawers (with black slam latch handles) are warranted for **ONE (1) YEAR** from the date of purchase.

### A COPY OF YOUR SALES SLIP FOR PROOF OF PURCHASE IS REQUIRED

This warranty applies to the original purchaser for products which are installed in the United States or Canada and which are operated and maintained as intended for single family residential usage (if the unit is installed in a commercial / multi-user setting, a separate Commercial / Multi-User Limited Warranty applies and is available from RHP). This warranty is valid only with proof of purchase, commences on the date of purchase, and terminates (both as to original and any replacement products) on the anniversary date of the original purchase of the product per the above schedules.

This warranty **does not** cover parts which become defective as a result of negligence, misuse, or use not in compliance with the Installation and Owner's Manual, accidental damage, improper handling, improper storage, improper installation, **lack of required routine maintenance** (as specified in the Installation and Owner's Manual), or electrical damage. Product must be installed as specified in the Installation and Owner's Manual by a **qualified professional installer**. This warranty **does not** apply to normal occurrences that may be expected with any outdoor product such as rust, corrosion, oxidation, or discoloration unless the affected part becomes inoperable. RHP products including valves, pilots and controls are designed and certified to be used as a system. Modifications to products which are not specifically authorized will void this warranty and could render the product to be unsafe. Burners, valves, parts, remotes, accessories, etc. used with this product must be RHP products or this warranty is void.

Warrantied items will be repaired or replaced at RHP's sole discretion. This warranty **does not** cover labor or labor related charges, except as provided by separate specific written programs from RHP. All repair work must be performed by a qualified professional service person and requires prior approval of RHP.

RHP may require the defective product or part to be returned to the factory to determine the cause of failure. RHP will pay freight charges if the product or part is determined to be defective. This warranty does not cover breakage in shipment from our independent distributor to its customer if the damage is determined to have occurred during that shipment.

This warranty specifically excludes liability for **indirect, incidental**, or consequential damages. Some states and provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusion may not apply to you. This warranty gives you specified legal rights, and you may have other rights that vary from state to state or province.

For additional information regarding this warranty, or to place a warranty claim, contact the RHP dealer where the product was purchased.

When contacting your RHP dealer or the R.H. Peterson Co., please provide the following information:

- Your name, address, telephone number, e-mail
- Sales receipt showing where purchased and date purchased
- Model number, serial number of product, date code
- Relevant information: installer, additions, repairs, when defect was first noted

**TO REGISTER YOUR PRODUCT ONLINE GO TO: [WWW.RHPETERSON.COM](http://WWW.RHPETERSON.COM),  
AND CLICK ON PRODUCT REGISTRATION. THANK YOU FOR YOUR PURCHASE.**
