Fire Features

From Fireplaces perfect for cuddling up under the stars, to Firetables ideal for entertaining, each product is expertly crafted from innovative glass fiber reinforced concrete (GFRC). GFRC derives its strength from portions of alkali-resistant glass fiber and acrylic polymer blended into durable concrete to withstand the outdoor elements. Modularly constructed for easy assembly, American Fyre Designs (AFD) products are an elegant addition to any outdoor area. Most AFD Fire Features include a convenient ON/OFF Commercial FyreStarter electronic ignition (must be controlled with our Commercial 120V Timer Controls, see pages 6 & 7) and are available in 7 GFRC concrete finishes.
