AMERICAN-MADE EXCELLENCE IN Outdoor Living

Once upon a time, the outdoor living space was a concept found only among the most exclusive custom luxury homes. Now, it's an idea that's designed and built into homes nationwide, providing homeowners a place for relaxing, entertaining and cooking outdoors. These spaces not only enhance life at home, they also enhance property values. For example, outdoor kitchens, which are integral to the space, recover 100 percent of their installation cost when the home is sold while delivering enjoyment throughout its life.*

RH Peterson saw this trend coming nearly 80 years ago. That means decades of quality improvements, innovation, and inspired design. Architects, designers, builders and homeowners can count on us for the best, most durable and dependable products in the industry, including luxury grills, a complete line of outdoor kitchen accessories, fire tables, fire bowls, fireplaces and much more.

From Fire Magic, our premium luxury outdoor kitchen brand, to American Fyre Designs with its extensive line of outdoor fire features, RH Peterson brands offer you the very best.
